NBCRFLI HEALTH PLAN

NBCRFLI STANDS FOR THE NATIONAL BARGAINING COUNCIL FOR THE ROAD FREIGHT AND LOGISTICS INDUSTRY

The Council is governed by the Labour Relations Act of 1995, which allows for registered employer and employee organisations to establish a bargaining council for an industry and area. Through collective bargaining, trade unions and employer organisations, which are party to the Council, are able to negotiate matters that are of mutual interest to the Road Freight and Logistics Industry. This approach allows for better regulation of matters which affect the Industry as a whole, thereby enforcing minimum standards and conditions of employment within the Road Freight and Logistics Industry which contributes to labour stability within the Industry. The Council also supports industry members through managing the industry's annual leave, sick leave and holiday bonus funds, and by providing health and wellness services.
