MOBILE UNITS TO PROVIDE SUPPORT IN CHOLERA AFFECTED PROVINCE.

Due to the cholera outbreak that has affected Limpopo Province, the National Bargaining Council for the Road Freight Industry (NBCRFI) is providing support to the drivers by sending two of our mobile units to the area. These units are ordinarily used as part of our Trucking Wellness programme, providing primary healthcare and voluntary testing and counselling.

The units will be stationed at Beit Bridge Border Post, where we already have a wellness centre, from Monday 08 December 2008. Truck drivers who are travelling across the border can access bottled water and medication. Should there be further treatment required, they will be referred to the nearest healthcare facility. We request that companies encourage their drivers to access whatever medical assistance they made from the mobile units and wellness centre.

Yours sincerely,

Joe Letswalo
